RePhraser

Fast Typing

JENNIUS LTD has been wondering for some years if professionals could not be helped in writing repetitive texts more efficiently.

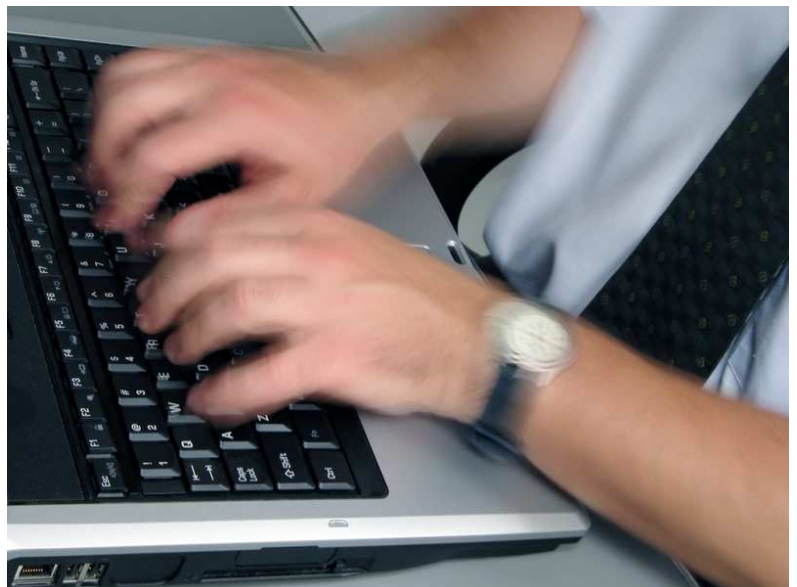

And so we came up with RePhraser - a dynamic, intelligent and collaborating Typing Assistant. RePhraser anticipates words and sentences before they are typed, and learns new words and sentences while you are typing.

JENNIUS Software

18 Cathedral Street
Norwich
NR1 1LX

RePhraser

Facts

- Words are anticipated and displayed before they are actually typed. Simply choose a word from the list and RePhraser inserts it at the current position.
- Words are anticipated by RePhraser based on an intelligent, self-learning algorithm.
- Words, sentences and statistics are stored in a central database. This allows groups of professionals to collaborate and share words, sentences and statistics to speed up their typing and to align with corporate and professional guidelines.
- No software installation required
